## ○ Academic Courses

### ▶ Korean Language 1 3-credit | Mandatory

Throughout the course, beginners will be able to read and write the Korean language and understand basic daily dialogue. Intermediates (or advanced students) will be able to better understand intermediate words and phrases, and expand their knowledge to academic context.

### ▶ Asia Business 3-credit | Elective

The Asian Business course provides international students with a detailed overview of the economic, political, and social issues facing Korea and other Asian countries in the region. In particular the course details a range of topics such as an examination of: The Asia Economy, North East Asian Trade and FTAs, Korean Pop Culture and Business, Korea R&D Facilities, Cross-cultural Communication Skills, Sustainable Development Practices in Asia, New Management Initiatives, and Firm Strategies in Global Market Places.

### ▶ World Englishes and Cross Cultural Communication 3-credit | Elective

- The basic properties of human language and the basics of English linguistics
- The socio-linguistic aspects of communication and cross-linguistic perspectives
- Verbal-nonverbal communication, gender-differences/regional differences and dialectology
- The diversity of Englishes, world Englishes, and history of English in a cultural aspects
- Media-oriented and flipped-learning based course design

### ▶ Communication and Korean Culture 3-credit | Elective

Through the course, students will be able to explain the basic concepts of intercultural communication and will be better able to facilitate communication between Koreans and members of other cultures in a variety of settings. Special consideration will be given to the areas of health and business management. Students will have the opportunity to work with others on group presentations as well as pursue their own areas of interest in individual assignments.

### ▶ Biotechnology and Agriculture 3-credit | Elective

The course will provide basic concepts of biotechnology used in the agricultural industries in Korea. Main objectives of this course are: 1. Enhancing the understanding of animal and plant biology through presentations on newly developed techniques such as animal cloning and transgenic plant production. 2. Providing students with experience in animal & crop production and control of pests & diseases, along with field trips to related industries and agricultural fields. 3. Introduction to Korean biotechnology production and bio-safety through classroom, laboratory and field trip experiences.
