THE POWER OF LOCAL KNOWLEDGE IN INCREASING FOOD BUSINESS COMPETITIVENESS

Term of Reference

Nowadays, the price, sensory appearance and taste are not the only consideration for current food consumers. Based on marketing survey done by USA in 2011, functional food and health food which provide more than just nutrition are preferable for majority Americans. The similar trend is actually also true for the global citizens. This condition will encourage a lot of people to make food not only for the basic needs of the body, but also to maintaining health. Even more, food should be able to cure or eliminate the negative effects of certain diseases. Of course, food with health effects and functionality will make a higher sale value than the others.

Indonesia is known for its local knowledge of various healthy foods. This local knowledge is then used by food manufacturers to create food products that have health effects and functionality. Indonesia traditional herbal drinks with wide range of health benefit usually called as Jamu. Jamu is made from various herbs that are beneficial to health. Nowadays, Jamu is made into instant powder to give more convenience for the consumers. Other example of the use of local knowledge is the creation of isotonic drink from coconut water. Since ancient, coconut water has been used by Indonesian people as refreshing drinks during hot weather or when you're sweating a lot. Today, manufacturers use this local knowledge to make an isotonic drink of coconut water as a replacement for body fluids after exercising.

National Student Conference on food science technology has become the identity of Department of Food Technology, Soegijapranata Catholic University. Since 2000, this annual event had discussed various topics related to food science and businesses with recognized experts in their fields are cordially invited as keynote speakers. Keynote speakers will share their own point of view, knowledge and experience associated with the theme of the conference. On the other hand, to meet the demand proposed by student from East Europe who learns specified about Jamu in August-December 2012 at Soegijapranata Catholic University, then part of this event will be dedicated for and due to the international participant's fellowship as the 1st International Student Conference. Therefore on this year

these conferences will be held as 1st International Student Conference and 12th National Student Conference with theme "The Power of Local Knowledge in Increasing Food Bussiness Competitiveness".

Participants are expected to contribute in developing their own local knowledge to create food products that have more selling points. In addition, the conference is expected to be the place for food industry practitioners, food scientists and students of food technology and other related sciences to share knowledge and innovative ideas for the development of the food in the future.
